EXPERIENCE

Software Engineer
New Era Software
10/2016 - Present

- Developed MVC based framework to support fine-grained time critical publishing of content that delivered significant cost savings, reduced an implicit weekly development vs. release cycle to one initial deployment for the entirety of the campaign.
- Developed DBA system that was well-received company-wide.

Software Engineer
Top Software
08/2013 - 09/2015

- Redeveloped existing systems to support custom account management, content and mobile business verticals.
- Successfully integrated WCF services for RIA support and product fulfillment application, multilingual content services and a pluggable payment provider architecture for pre-authorization credit card payments.

Software Developer
Zohoware
04/2012 - 07/2013

- Developed a platform for e-Commerce digital distribution built upon Microsoft Commerce Server 2012 for BT.
- Provided infrastructure and integration guidelines for Navl and Rylo for load balanced, web farm deployment behind Namo content delivery network.
